SUMMARY

For 3 years, I have been developing myself in HTML, CSS, JavaScript, React.js and Node.js and I have been increasing my skills in creating powerful and user-friendly interfaces of web applications continuously. I want to become a professional front-end developer and I want to continue to improve myself in a professional environment.

PROJECTS

ShopEasy (<https://shopeazy-client.onrender.com>)

- I designed the user interface (UI) and implemented it using React.js and Tailwind CSS.
- developed the server side with Node.js and managed the APIs.
- As the main developer, I led the project from start to finish.
- I implemented a secure payment system using the Stripe API to integrate payment transactions.

BlogAnz (<https://bloganz-client.onrender.com>)

- I designed the user interface (UI) and implemented it using React.js and CSS3.
- developed the server side with Node.js and managed the APIs.
- I created a blog post editor that supports formatting posts using markdown format.
- I integrated an interactive system that allows users to comment and like their posts.
- integrated an reputation system based on the likes.

Vote Vortex (<https://vote-vortex-client.onrender.com>)

- I designed the user interface (UI) and implemented it using React.js and Tailwind CSS and designed the server side using Node.js.
- was the lead developer in the project and coordinated the project process.
- I developed a survey creation tool that allows users to create and customize surveys.
- I took over database administration and optimized database queries to efficiently process large data sets.

Guess What (<https://guess-what-client.onrender.com>)

- I designed the user interface that allows users to participate in games and place bets using React.js and Tailwind CSS.
- developed the backend side of the game with Node.js, processed users' predictions and calculated the game results.
- created a database system that regularly updates the game results and manages the prizes users have won.

EDUCATION AND QUALIFICATIONS

Sep 2018 - Aug 2023	Bachelor of Science <i>Kırıkkale University, Kırıkkale</i> Department of English Translation and Interpreting
Sep 2020 - Jul 2023	Associate of Science <i>Anadolu Üniversitesi, Eskişehir</i> Department of Web Design and Coding

COURSES

Front End Development Libraries <i>freeCodeCamp.org</i>
JavaScript Algorithms and Data Structures <i>freeCodeCamp.org</i>
The Complete Junior To Senior Web Developer Roadmap <i>Udemy</i>
